

Pinnacle Restores Faith in Staffing for Damage Restoration Company

When disaster strikes, people rely on All Dry USA to help restore their property. From mold remediation, water and fire damage restoration, general contracting and more, All Dry USA is available 24/7 to help both residential and commercial properties return to normal. So, the company must have reliable employees it can afford. And, this is where Pinnacle comes to the rescue as a dependable, affordable partner.

For Brock Shelton, Mitigation Manager in All Dry USA's Dallas-Fort Worth market, other staffing companies he had used were simply getting unaffordable.

"The price was just so much above the market that I needed to find another source," Shelton said. "Pinnacle's pricing is completely fair."

But that's not the only thing that separates Pinnacle from other staffing firms. According to Shelton, Pinnacle workers have simply been better.

"With other companies I've used, I've had theft, or people try to hide away from where the work area is. They're constantly on their phones," Shelton said. "That's not something I've experienced with Pinnacle. So that's been a blessing as well."

As if that weren't enough, Shelton knows that his local Pinnacle recruiters and General Manager stands ready to assist when the need arises.

"(Pinnacle) has been extremely responsive answering every phone call and text and email no matter the time of day," Shelton said. "(They have) communicated very well keeping us updated on who and when will be at each job site, and has even come out to the job site to make sure that the temp showed up and was ready to work."

"Pinnacle's pricing is completely fair."
